SUMMARY

MCA graduate from PES University with strong expertise in Java and hands-on experience in building dynamic web applications using Angular, React, and MySQL. Solid foundation in software engineering fundamentals . Proven ability to deliver end-to-end Machine Learning projects with strong analytical and problem-solving skills. Eager to join a dynamic development team and contribute to impactful software solutions.

EDUCATION

Master of Computer Applications (MCA), PES University, Bengaluru 2024–2026

Specialization: Security Essentials

CGPA: 8.5

Bachelor of Computer Applications (BCA), JSS SMI UG & PG Studies, Dharwad 2021–2024

CGPA: 9.4

SKILLS

Technical Skills	Java Programming,Python,Machine Learning,Angular JS,React JS,C,Linux,DBMS(MySQL)
Soft Skills	Communication
Other	Canva ,Overleaf

EXPERIENCE

Full Stack Developer Intern Feb 2026 - May 2026

Digi Yogi Private Limited

Bengaluru, Karnataka

- Worked on end-to-end development of web applications, handling both frontend and backend components. a key role in stabilizing and improving the backend of the Astro11 application by identifying and fixing critical bugs.
- Optimized API performance and database interactions, contributing to a smoother user experience.
- Participated in feature implementation, testing, and deployment while collaborating with cross-functional teams.

Frontend Developer Intern

APR 2024 - Jul 2024

Global Solution Makers

Hubli, Karnataka

- Implemented user interface components and improved website usability and visual appeal.
- Fixed frontend bugs and improved website performance and compatibility across browsers.
- Collaborated with developers to deliver functional and visually appealing web applications.

PROJECTS

Secure Carbon-Aware Scheduler (IEEE ICSCSS 2026 Recognized Research Project)

- Developed a secure carbon-aware scheduling system to allocate workloads across energy-efficient and trusted computing nodes.
- Integrated machine learning models to predict carbon intensity and optimize workload placement for reduced environmental impact.
- Implemented security-aware node selection and predictive latency modeling to improve scheduling decisions.
- Applied multi-objective optimization techniques balancing sustainability, security, and performance; presented the work at IEEE ICSCSS 2026.

KanBan-Flow — MEAN Stack (MongoDB, Express.js, Angular, Node.js)

- Developed a full-stack task management application using the MEAN stack with an interactive Kanban board interface.
- Built RESTful APIs and implemented CRUD operations for task creation, assignment, tracking, and status management.
- Implemented drag-and-drop functionality for seamless task movement across customizable workflow stages.
- Designed a responsive user interface using Angular and Bootstrap, ensuring efficient data management and improved user experience.

Udemy Course Success Predictor — Machine Learning

- Developed a machine learning model to predict Udemy course success using course metadata and engagement metrics.
- Performed data preprocessing, feature engineering, model training, and evaluation using multiple machine learning algorithms.
- Achieved 89% prediction accuracy using a Support Vector Machine (SVM) model.
- Built an end-to-end predictive analytics pipeline demonstrating deployment-ready machine learning workflows.

ACHIEVEMENTS

- Received the **CNR And Distinction Award** for outstanding academic performance(Top 20 percent) at PES University (CNR awarded twice).
- Secured **Rank 1** in the department during undergraduate studies for one academic year.
- Presented the research project ”**Secure Carbon-Aware Scheduler**” at the **IEEE ICSCSS 2026 Conference**.
- Authored and published research work in an **IEEE-recognized conference proceeding**.
